General Assembly
Washington, DC
March - June 2015
Web Development Immersion

ABOUT ME

A dedicated dreamer with a passion for strategic solutions, exploring the limitations of what is known, and eager to take creative risks to build something new. As a full-stack developer, I'm seeking an opportunity to implement hard skills, transform ideas into quality code, & build a career that grows with the momentum of the field.

DEVELOPER EXPERIENCE

General Assembly, Washington, DC
Full-Time Web Development Immersive Student, *March - June 2015*
Full-Stack development program focused on common best practices in object-oriented programming, MVC frameworks, data-modeling, and test-driven development. Projects include:

> **Fridge Flex:** Individual project developing utility app built on rails, using OOJ, and experience building a back-end server object to handle api requests.
> **RealSound:** Final individual project using Backbone.js on top of Rails framework, incorporating oauth, jasmine testing, and jQuery plugin.
> **Spanish Language Study Guide:** My interpretation of a flashcard application, and a first look at ruby and active record without a framework.

USA TODAY Idea Lab via General Assembly, Washington, DC
Front-End Web Developer, *April 2015*
Program partnership providing opportunity to work with UX design and execute their design using CSS, HTML, and first look at Javascript. Project:

> **Marijuana Policy Tracker:** Group project built on Rails, utilizing Javascript to build timeline feature, and styling front end to match design.
